Number of the Day! Name: \_\_\_\_\_

Write this number in word form.

Write an addition sentence to make this number using 3 whole numbers and 4 fractions:

Draw this mixed number.

How much more to the next whole?

Convert this to an improper fraction.

Create 2 equivalent fractions. If the number of the day is not simplified, make sure you include that for one of your equivalent fractions.

Show about where  $\frac{8}{15}$  would be on a number line. Label the benchmarks you use too.

Multiply!  $\frac{8}{15} \times \frac{4}{9}$

Circle which is closer. 8 or  $\frac{9}{15}$

Compare!  $\frac{8}{15}$  ○ 0.5

Bonus! Convert to a Decimal

Subtract!  $\frac{8}{15} - \frac{4}{9}$

Add!  $\frac{8}{15} + 13$

A few weeks ago, I asked my Facebook

Some of which include: Number sense and operations, algebra, geometry and spatial sense, measurement and functions and probability. This procedural strategy will instill in them the idea of a more short and simple step-by-step resolution. More importantly, our concepts of Matemática 5th Series Basic - Free Printables and online games involve facilitating practice through actually outstanding resources. This can be seen in our efforts for: Build your math skills in an exciting and interactive classroom learning, providing activities of extra and fun mathematics Create to perform an excellent cerebral mathematics in children providing gea other ways to follow A step-by-step solution for concrete answers, in addition to our 6th million mathematica skills also consist of larger, interactive learning tools, priphilable spreadsheets and reinforcement exercises. 2nd category spreadsheet by category Considering the fact that children need extra opportunities to reinforce their conceptual understanding and resolution skills of mathematics problems, we provide repeated opportunities for them to play games Mathematics, as well as solve simple 3 mathematics concepts. However, when played repeatedly, these modified games will not only support the boy's computational fluence, but will allow them to develop many mathematical ideas. More importantly,  $\frac{8}{15}$  focus  $\frac{8}{15}$   $\frac{8}{15}$  Mathematics of the sixth year with answers and online games will raise the speed and need of the child in all the concepts of mathematica. In fact, this mathematic practice feature contains very interesting abundance Mathematics games for grade 3 online as well as grade spreadsheets 3 pdf free download. A great importance Observing here is that our Solution Sheets of Mathematic Skills 6th Series should be consulted only after an attempt to solve problems have been made. Available in this great resource is a perfect combination of fun learning 4th mathematics Matemotics games Mathematica PDF spreadsheets that will give your children the opportunity to practice your mathematical skills while having fun in the process. Also of great advantage in our 6th daytime math skills: free games and pdf spreadsheets, is the ability for children to gain greater proficiency in the four basic mathematical operations, great competence with opera Alternate, talents to easily apply the concepts of geometry to the resolution of problems, development of complex skills of graphics and use of functions and probability of making predictions. This informal way of learning will not give the pressure of children, but prefer to encourage and give them another chance to review important mathematical skills. Find a perfect way to make the mathematics very easy and interesting for your third years with our 3th mathematics practice games and PDF spreadsheets. Secondly, every concept consists of an exceptional sixth daytime spreadsheet with answers and online games. In this way, children are learning to solve problems independently, and making corrections later for the mistakes that have been made. In fact, parents can now assess their son's mathematical fluidity playing with them at home. With evidence for this our efforts to bring mathematics to life, it will allow your young mathematical learners to feel more involved and animated with mathematics concepts. Page 3 Available in this great resource is a perfect combination of fun Learning 4th learning of Mathematics Protica games and PDF spreadsheets that will give your children the opportunity to play games Mathematics while having fun in the process. However, as they commit to our free educational games and printables for students of the 5th day, they will not realize that they have been having a practical multiple mathematics skills in Variety of different concepts, such as the concepts of mathematics 5th Básico. The best way to involve your children in the study of mathematics is with our things of pleasant mathematics  $\frac{8}{15}$  - a few hours of fun learning is the best way to involve your children in mathematica studying with our our Mathematics. In this light, our sex mathematic spreadsheets with answers and online games is a final guide where children can get fast help. How can you improve the performance of mathematics of your 6th grader? So, to say, all our spreadsheets are supported with step-by-step solutions for each question. This is to ensure adequate correctness by any error made in the course of the solution of a problem. This will gather a perfect mathematics understanding in children for large mathematics. First, following the main yarns of mathematics for the year 6, we systematically cover all the foundations of which the 6th day is expected to learn in mathematics. First of all, we give repeated opportunities for children to play online, as well as solve a variety of stimulating mathematics exercises using very simple strategies. As we know, the games are fun and also can create a foundation to develop the kid's mathematical raciocanium. In this light, our resource is highly enriched to deepen depth prophets and mathematical raciocians through the 5th year mathematics fun games and spreadsheets. Our goal is to create these exciting online math games and free math spreadsheets 4th SA © Tie are a way to make all the students of the 4th Series have easy access, m of practicing the solution of mathematics problems in a pleasant way. It is also interested to note that our math games for online practice and spreadsheets were enriched with practical mathematical skills in a variety of different skills as a number; I estimated; Comparing; Problem solutions; spatial sense; measurement; patterns; classifying; Time; First, in a very captivating way, we encourage the children to follow a general procedure for problem solving. In second Our idea of creating fun diagrams, photos and shapes inspire the children to quickly remember the problem, so the easy strategy to quickly find the solution. Of spreadsheets, for games and lessons, everything you need to know about our sixth sixth Math spreadsheets with answers and online games are their unique strategies to solve mathematics in the simplest way. Together with the intention of making mathematics more fun and easy for children, we also design also 3-day mathematics practice games and pdf spreadsheets to drill the child As a difference of problems of troubleshooting. Página 4 raise the knowledge of your child's mathematics to be sharp with a wide collection of amusement games of Matemática 5a Series and spreadsheets. These fun 5th-day mathematic skills practice games Math Math and PDF spreadsheets are a great way to strengthen the main students of the fifth sést rie of mathematics lessons learn in the class, but also having fun. First of all, given the interactive nature of our games and exciting spreadsheets, children will always discuss one with others using their specific mathematics vocabulary for the structure of the game. Then our fun motivating games and alternate exercises stimulate strategic thought skills of mathematics in children. In this case, mathematics will definitely be fun when children will get involved in a constant praction after learning tools above and our progressive way to introduce new concepts. In view of this, you will find here fun games, captivating spreadsheets, interesting real-life royal word problems etc. Basically, the best way to improve your mathematics performance from your 6th day is helping them to analyze and understand all your mistake. Secondly, our games are so relaxed and comfortable  $\frac{8}{15}$   $\frac{8}{15}$
